Stockton, California

A decorative border composed of repeating rectangular and diamond-shaped motifs, enclosing the central text.

THIS VOLUME is respectfully dedicated to our clients who have
entrusted their building projects to us in the past and there-
by made possible the publication of these buildings by the authors.

This book is presented as illustrating some of the work of our firm and its members and also showing some of the progress being made by "Our Home City Stockton."

To Those Who Intend to Build

We offer competent and complete architectural service and do not undertake any work that we cannot give our personal attention. We guarantee our Plans and Specifications to be complete, and to cover every item for the proper and entire completion of your building, so that there will be no extras after the awarding of the contract. Our organization is complete, competent and efficient in all its branches and we are prepared to undertake your building projects as Architects on a percentage basis, or a fixed fee, or as Architects and Managers of Construction on cost plus a fixed fee basis, with a positive guarantee as to the total cost of your project. The large amount of work handled by our firm gives us an exceptional buying power, and our system of segregating contracts will secure you a considerable saving on your building projects. We feel that thirty years of successful practice of the Architectural profession warrants us in saying that we can give you entire satisfaction. May we not consult with you on your building projects to our mutual advantage.

Glenn Allen & Charles H. Young

Certified Architects and Managers of Construction

11 South Sutter Street, Stockton, California

Mrs. Genevieve Hays, Oakland, Calif.
H. S. Hanlon, Sacramento, Calif.

Stockton

"The Gateway City of the San Joaquin Valley," was founded in 1847 and incorporated in 1850. It covers an area of ten square miles and has an assessed valuation of sixty-five million dollars, and a population of fifty-six thousand, and is conducted under the City Manager form of Government. Stockton has:

- 125 Miles of Paved Streets.
- 3 Transcontinental Railways.
- 2 Electric Interurban Lines.
- 1 Steam Interurban Line.
- 94 Passenger Trains, Daily.
- 7 Street Railway Lines.
- 28 Stage and Truck Lines.

A Municipal Aviation Field of 111 acres with four hangars.

A \$200,000 Subway under the Southern Pacific and Western Pacific railroad tracks at Miner Avenue has recently been completed and also a \$140,000 Bascule Bridge at the west end of Washington Street.

- 1,550 Retail Establishments doing an annual business of \$41,051,000.
- 22 Wholesale Establishments doing an annual business of \$28,229,000.
- 7 Banks with deposits amounting to \$37,086,400, with bank clearings of \$146,787,600 in 1926.
- 23 Public Schools with 8430 Students and 360 Teachers.
- 1 Commercial College.
- 2 Parochial Schools.
- 1 University.
- 1 Library with 96,000 volumes.
- 35 Churches, including the \$150,000 Christian Science Church and the \$40,000 Church of the United Brethren which are now under construction.
- 12,000 Homes.
- 26 Hotels.

- 50 Apartment Houses.

- 2 Daily Newspapers.

- 260 Manufacturing Establishments, employing 4733 persons with an invested capital of \$21,658,000, producing annually products valued at \$35,676,000.

- 15 Public Parks in various parts of the city.
- The finest Municipal Baths on the Pacific Coast.
- Fine Municipal Golf Links.

- 7 Theatres.

The City has already erected and furnished a \$600,000 Municipal Memorial Auditorium with a seating capacity of five thousand. This is on the west side of the new Civic Center. The new \$500,000 City Hall has also been completed and occupied on the south side of the Civic Center.

By far, the most important developments in connection with Central California's future where those regarding the Stockton Ship Channel Project. This Project calls for the improvement of the San Joaquin River and Stockton Harbor to accommodate deep water vessels. For this purpose the people of Stockton have provided \$3,000,000, the State is providing \$419,000 and the Federal Government has authorized the appropriation of \$2,407,500.

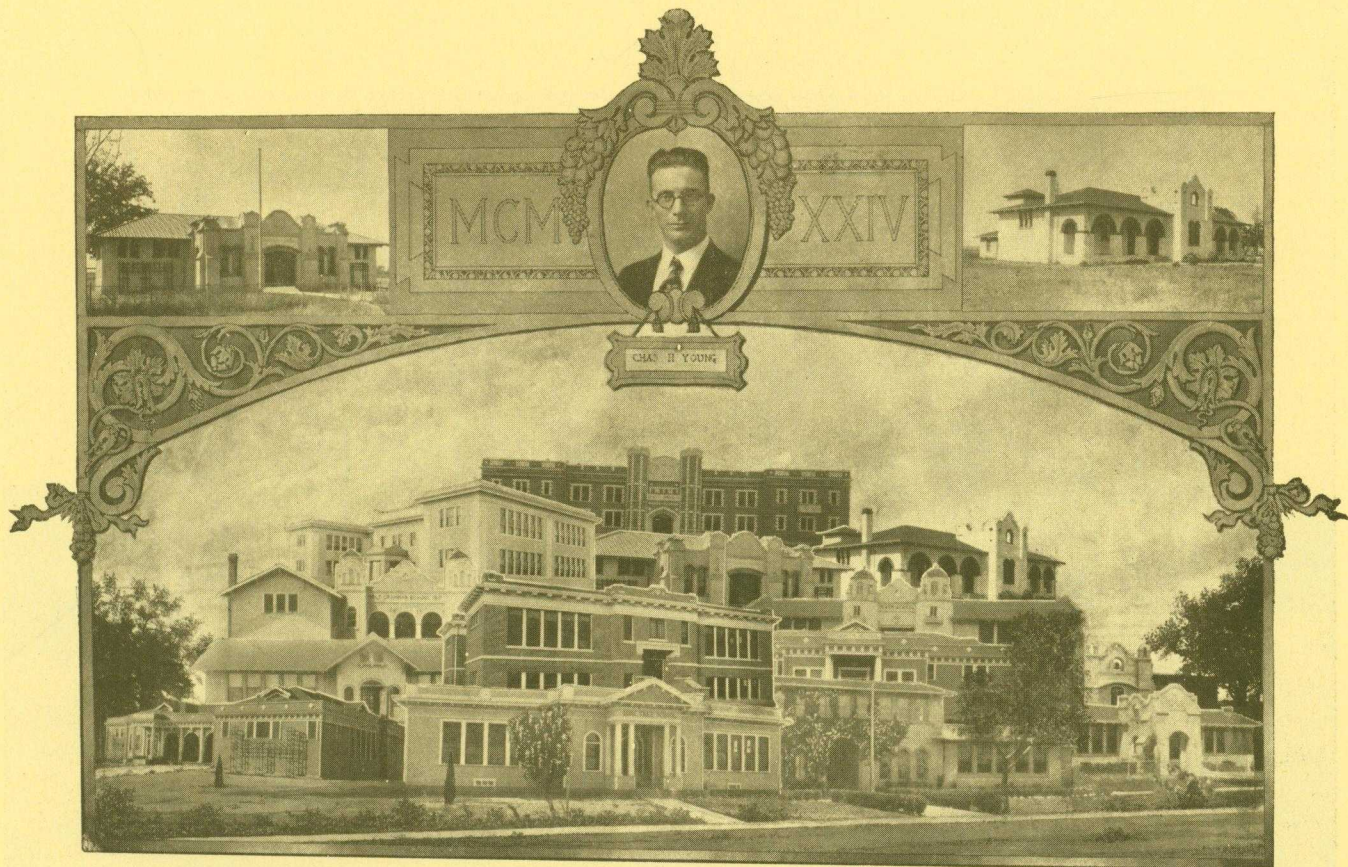

The deep water channel will have a minimum depth at mean lower low water of 26 feet, and a minimum bottom width of 100 feet. The levees will be set back 230 feet from the center line of the stream and the minimum width of the channel right-of-way will be 750 feet.

According to Federal specifications, terminal facilities to handle a minimum of 1,000,000 tons a year must be provided. This will call for 800 linear feet of transient sheds and 1200 feet of wharves. Adequate turning basins will be provided in connection with the harbor facilities at Stockton.

Surveys to determine the exact channel changes to be made are beginning now, and actual dredging will commence in 1928.

“Our OWN Home”

The family that can fondly refer to “our own home” has something to be proud of. And they wouldn’t go back to “living in rent”—just ask them.

You can come into home ownership on the definite contract plan and you have this advantage over most installment plans. The home is usually worth more when it is all paid for than it was in the beginning. Few other investments have this big advantage, and no other investment yields quite such dividends in family happiness.

Ask about our “Home Ownership Plan.”

The Ad-A-Room Bed Adds an Extra Room to Your Home

FOR SMALL HOMES: Builders of small homes are finding the AD-A-ROOM BED (wall bed) gives their home all the convenience of an extra or guest bedroom without actually building and furnishing a separate bedroom. By planning their living room or dining room with an AD-A-ROOM BED they are able to convert that "daytime" room into a spare bedroom for the night. During the day there is no suggestion of a bed in the room, for it is in a closet out of sight, yet always made up and ready at a moment's notice to add a spare bedroom.

FOR LARGE HOMES: In the larger homes the AD-A-ROOM BED (wall bed) is installed in the room that would ordinarily be the guest bedroom. Some families furnish this room as a sun room, others as a library or den and enjoy the use of this added room, then when company calls this room is available as a "guest bedroom" during their stay.

AD-A-ROOM BEDS are ideal for sleeping porches as the bed is up and out of the way during the day.

Servant's rooms are usually small, and when furnished as a bedroom offer little to the servant other than a room in which to sleep. But when designed with an AD-A-ROOM BED that room becomes a cosy two-room suite, furnished as a pleasant living room during the day, and converted into a bedroom for the night.

FOR APARTMENTS Marshall & Stearns AD-A-ROOM BEDS have been the accepted standard for over twenty years. They are manufactured in many types to fit the various size closets and room arrangements.

INDIRECT LIGHTING WITH FRINK REFLECTORS

The lighting of residences, auditoriums, churches, theatres, banks, lodge rooms, etc., by indirect methods is becoming more and more popular.

Indirect lighting with continuous mirror lined trough reflectors compares favorably with cost of better class lighting fixtures.

FRINK originated this type of lighting many years ago. Our vast experience in this field has enabled us to build reflectors, which are unequaled in efficiency of proper distribution and light output.

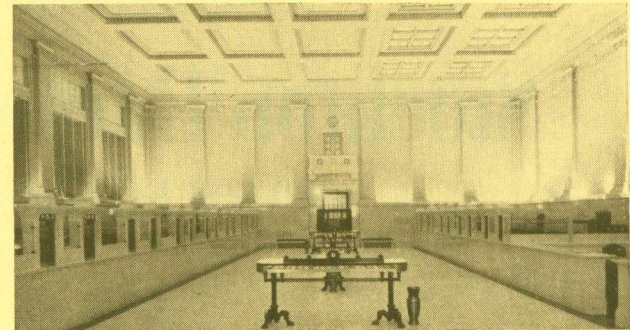

Before planning the lighting of your new building, whatever kind it may be, whether residence, commercial, church, theatre or club house, you will do well to consult with us in regard to your lighting system.

Tempting the Home Owners

LUXOR
SHADE CLOTH
STANDARD
MADE ROLLERS

Nationally Known Window Shades and Linoleum

We have been in business for over twenty years. Window Shades, Linoleums and other home furnishings of quality and of national repute ONLY find consideration in our establishment. We welcome an opportunity to serve new home builders and designers in furnishing the largest public building or residence or the more modest home, because this has become in large measure the major part of our business.

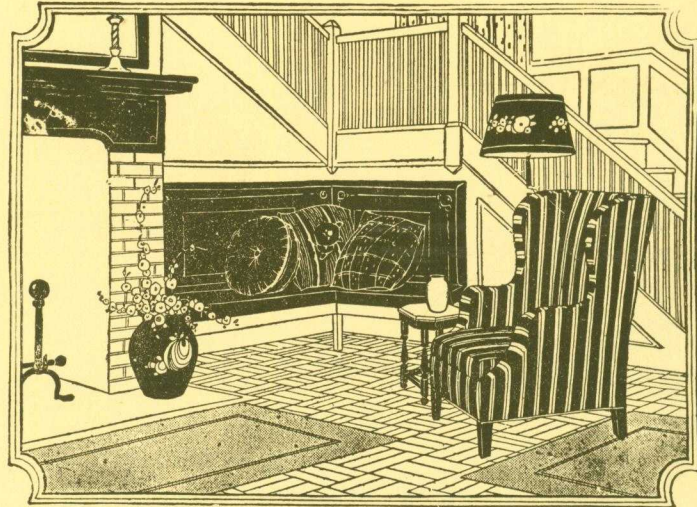

WHEN you stop to consider it, the home owner is as interested in furnishings for a new bungalow, flat or apartment as she or he may be in the new structure itself—for unless careful selection is given to the permanent interior furnishings,

much satisfaction is lost to the home owner, and consequently certain prestige is lost to both owner and designer of the home.

Today, the architect is consulted on the selection of linoleum flooring, window shading and other permanent furnishings. He, with his knowledge of interior planning, can advise his clients on important details of colorful flooring and of proper window furnishings.

OUR SERVICE TO BUILDERS

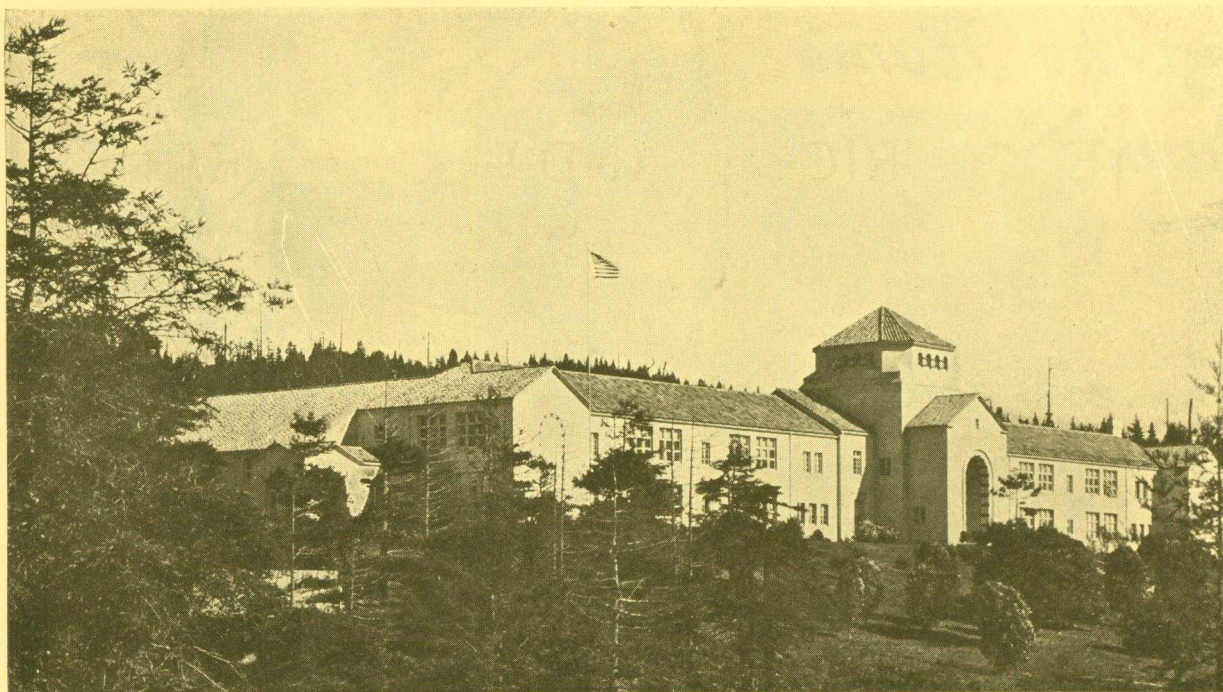

For interior decorating and furnishing service to his clients, the architect need but look to our advisory department for whatever his requirements may be. We will be glad to co-operate in the selection of beautiful LUXOR window shadings and floors of Armstrong's linoleums, working either from plans or rough sketches. We will furnish upon request, Architect's Specification Books on either Linoleum or Window Shades. This service carries no obligation either to the architect or the builder.

Pabco 10 and 20 Year Roofs

These are the famous built-up roofs, constructed according to definite Pabco specifications. Each roof is covered by a maintenance agreement in which we do more than merely guarantee the materials. We make such a plan worth while by contracting to keep your roof in perfect condition during the life of the agreement.

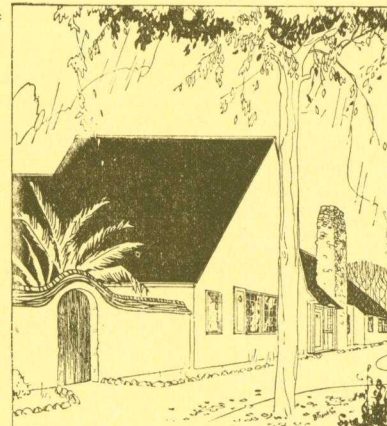

ASSURED PROTECTION FOR YOUR ROOF

Improved, modern construction demands better materials—better workmanship.

Pabco Shingles and Pabco 10 & 20 Year Roofs meet this demand and as a result have long been accepted as standards of excellence not only on the Pacific Coast, where they are made, but in more than 40 countries of the world.

Here you may obtain these enduring, weatherproof, fire-retardant materials. Here, too, you may obtain the services of an organization of experts in construction, roof design and color harmony that has rendered invaluable assistance to leading local architects and building owners.

To make this genuine public service as broad and helpful as possible, we solicit all inquiries regarding problems of waterproofing and roof construction. A consultation never imposes any obligation.

Pabco Shingles

With Pabco Shingles you can carry colorful beauty up to the very ridge of your roof. You have your choice of many distinctive designs and innumerable, harmoniously beautiful color combinations. The colors are lasting. You can eliminate roof worries now by laying Pabco Shingles right over your old wood shingles.
